P, PA, PG, PK, PW, S, MG, M, MC, SP**

Piconics, Inc. shares your concerns and commitment to help eradicate the use of gold, silver and tin, mined in the Democratic Republic of the Congo.

Piconics is currently working with its supply chain to ensure that our metal sources do not originate in countries where human rights are being violated. Piconics expects our suppliers to comply with the Electronic Industry Code of Conduct and source only from responsible suppliers; however, due to the complexities of the metals supply chain, Piconics, Inc. cannot verify the origin for all metals used in our products or their intended use.

Piconics, Inc. is neither a smelter of gold, silver or tin ores nor a processor of gold, silver or tin secondary scrap.

Dan Merrill
General Manager
